

TUEOR just published the third DVD of the series about aesthetic medicine.

TUEOR, market leader, editor of one of the most important scientific journals in the dental field (DENTAL TRIBUNE and COSMETIC DENTISTRY) just published the last DVD of the series where Ezio Costa, my friend and colleague, and I are the authors and protagonists.

It is a very practical DVD that explains all the main techniques both for revitalizations (polyvitaminic, amino acids and hyaluronic acids) and biostructuring as polylactic acid and tricalcium phosphate. We practice the techniques directly on models who were very kind and polite to help us and, especially, trust our jobs and experiences.

This DVD follows the other two, already published, the first one was about reabsorbable fillers and the second one about the use of Botulinum Toxin type A on face and for axillary hyperhidrosis.

Once again, these DVD's are very practical and explain all the techniques, materials, and dilutions, in order to help the colleague who wants to immediately perform it.

And if someone has any doubts, it is possible to call the authors and ask for some explanations.

To see the contents you can click on the images to enlarge them.

Beside, you can call the TUEOR or my secretary for any order or clarification.

Cordially

Dr Redaelli Alessio
