

Skin of the signs of the zodiac: how to get ready for spring and summer.

Advice of Dady Negri, astrologist.

Spring comes and the first sign of the zodiac that opens the season is **Aries**. How the skin of this instinctive and impulsive sign will be? The skin of Aries is in general strong and resistant to the changing... but a balanced 2007 with a good diet, a delicate detergent and a moisturizing lotion can help you to make your skin more beautiful, waiting for the middle of May when Mars will give you energy... then, your skin will be ready for a great tan.

And then, here it come **Taurus**... that with its slowness it always seems in peace. Its way to be gives us the impression that its skin is always well treated.. and in fact it is a sign that never neglects itself but when Saturn will come in the middle of May, then its skin might feel the effect of stress and this might disturb you.. take good care of your skin with lotion and regenerative compresses...

Dear **Gemini**, you are always so young and full of energy that seems that you never get old... pay attention in June with the opposition of Jupiter... it can light off your color and then what can you do? Vitamins, vitamins and then vitamins again.. pay attention to your diet.

The skin of **Cancer** is the most delicate and fragile of the zodiac... some capillary can annoy someone since you are very sensitive. Good lotion and a good dermatologist can help you staying in shape.

Now it is the moment of the greatest and strongest sign: **Leo**. Always in the middle of the attention it does not want anything to be out of its place. But how your skin will be in 2007? Saturn in your sign will induce you to take more care of your skin, it will be a pity if it gets old!!!!!! For a Leo it totally will be the end.

Hello **Virgo**, pedantic and always in search of the minimum detail. Your attention for skin and care of your body is always perfect. A lot of money for a perfect skin is the best to feel always in harmony.

And then **Libra** that whenever is not balance, it is depress. So even skin needs to be at the top.. nutrient lotions and good cleanliness of face will give you the perfect look.. get ready for the summer and to be in shape.

Scorpio, water sign, introspective and sensual. Taking care of your skin, to you means seducing ... lotions, perfumes, essential oils will give you that touch of magic to be irresistible.

Sagittarius will be the favored, it is optimist and Jupiter will help you in April and August to feel good with your body. Lotions enriched of almond oil will regenerate your skin and even a treatment in a beauty center will make you feel a lot better.

Capricorn is the one that is more subjected to dehydration.. take vitamins and water not only for you skin but also for the entire body. Snuggles and massages will give you beauty and harmony.

But what happen to our **Aquarius**? Neptune is in opposition to Saturn that will bring some stress to your skin. How about some shopping buying good products for your skin? Go to a dermatologist who will help you out.

Let us finish with **Pisces**... your delicate skin will need some care especially at the end of April. Uranus in the sign will suggest you to get some alternative care: anti-age massages, shiatsu, plantar reflexology and revitalizing treatments for your face.

Have a good 2007 from your astrologist Bernadette
