

## The **energy** of your **sign**: find out your secret sign of the zodiac.

My presentation of the book written by

**Bernadette Negri from Oleggio**

Since always, doctors believe to what they see and astrology never belonged to my world of thinking. I never read my horoscope before going to work or before an important meeting.

But I know a lot of people, patients and friends, who have to read theirs before even get out of the house. If they do not listen to the astrologer they cannot start the day

As always, between the opposite, there is always a compromise.

Then, I read with pleasure, this book of my dear friend and now writer Dady (as we call her) and, sincerely, I found some side of my sign that are just me.

I was born on February 15th 1955; I am an Aquarius, the most amazing sign!

And in fact I like friendship and ideals, I love the colors blue and green, I actually have always been a dreamer.

Well, I do not want to anticipate the book, which is very good and easy to read.

And... optimist: he appreciates more the positive sides instead the bad ones, and you know how much optimism we need in this world.

The pictures, by Umberto D., are good too: here you can see my sign.

If you believe in astrology, then it is a book you need to read. It gave to me the impression to face every sides of a subject, followed by thousand of people.

Surely, since I have been known her, she talks to me about astrology and Zodiac, and now she writes down her experience.

You can find it in the best bookshops, but if you believe in it, you can write to the author to ask some explanation, or the sending of an autographed copy...

If you want to contact her or write her, mail to: [bernadette.negri@libero.it](mailto:bernadette.negri@libero.it)

Have a nice reading!
